Drilltec's Stabbing Guides are designed to prevent damage to tubing, casing, and drill pipe during stabbing before makeup.

The Drilltec Stabbing Guide with its tapered bumper protects the following:

- Pin nose and coupling
- Metal seal on connections
- Shoulder of drill pipe
- Coating on tubular pin nose
- Against thread stripping

The Convertible Stabbing Guide for connection O.D. sizes 2 through 15 inch contains a metal housing which has a replaceable elastomer bumper ring and replaceable centering inserts. The design of the Stabbing Guide makes it possible to exchange damaged parts without disposing of the entire tool. In addition, one metal body can be used to cover different sizes of pipe by inserting different size bumper rings and inserts.
